EN-ES PRINTABLE RESOURCE

Unveiling Science: Lab Reports & The Scientific Method

This vocabulary pack introduces essential terms for understanding lab reports and the scientific method, tailored for 6th-8th grade English Language Learners.

TOPIC

Lab Reports & Scientific Method

AGE BAND

6-8

PACK TYPE

vocabulary pack

LANGUAGE PAIR

EN-ES

Includes

- 18 vocabulary items
- 3 worksheets
- Mini-book (8 pages)
- Teacher notes & answer key

Recommended Use

Introduce vocabulary using flashcards or the mini-book. Use the tracing worksheet for spelling practice and the matching worksheet to reinforce English-Spanish connections. The coloring worksheet can be used as a fun review or for early finishers. Encourage students to create their own simple lab report using the learned terms.

Vocabulary Cards

CARD 1
Scientific Method
Método Científico

A flow chart showing steps: Observe, Question, Hypothesize, Experiment, Analyze, Conclude.

CARD 2
Observation
Observación

A student looking closely at a plant with a magnifying glass.

CARD 3
Question
Pregunta

A thought bubble with a question mark and a lightbulb.

CARD 4
Hypothesis
Hipótesis

A scientist writing 'If... then...' on a whiteboard.

CARD 5
Experiment
Experimento

A person in a lab coat mixing chemicals in beakers, with test tubes around.

CARD 6
Variable
Variable

Two arrows pointing in different directions, indicating change or difference.

CARD 7
Independent Variable
Variable Independiente

A hand adjusting a dial or lever, showing something being changed intentionally.

CARD 8
Dependent Variable
Variable Dependiente

A measuring tape or a thermometer showing a result, indicating something being measured.

Vocabulary Cards

CARD 1
Control Group
Grupo de Control

Two identical plants, one with a 'treated' label and one with a 'normal' label, showing the normal one.

CARD 2
Data
Datos

A spreadsheet or bar graph with numbers and labels.

CARD 3
Analysis
Análisis

A person looking at a chart or graph with a magnifying glass, thinking.

CARD 4
Conclusion
Conclusión

A scientist writing 'The hypothesis was supported/not supported' on a notebook.

CARD 5
Lab Report
Informe de Laboratorio

An open notebook with sections like 'Introduction', 'Methods', 'Results', 'Conclusion'.

CARD 6
Procedure
Procedimiento

Numbered steps or a checklist with arrows indicating sequence.

CARD 7
Materials
Materiales

A collection of common lab equipment: beaker, test tube, Bunsen burner, goggles.

CARD 8
Results
Resultados

A clear bar graph or line graph showing outcomes of an experiment.

Vocabulary Cards

CARD 1

Discussion

Discusión

Two students talking and looking at a lab report, exchanging ideas.

CARD 2

Safety

Seguridad

A person wearing safety goggles and gloves in a lab, with a 'safety first' sign.

Mini-Book: The Scientific Journey: Understanding Lab Reports

Print double-sided, fold in half, and staple to create a mini-book.

1

Title: The Scientific Journey: Understanding Lab Reports
Título: El Viaje Científico: Comprendiendo los Informes de Laboratorio

Illustration

2

What is the Scientific Method? It's a way scientists explore the world. It has steps to help answer questions and solve problems.
¿Qué es el Método Científico? Es una forma en que los científicos exploran el mundo. Tiene pasos para ayudar a responder preguntas y resolver problemas.

Illustration

3

Step 1: Observation & Question. First, you notice something (Observation). Then, you ask a question about it (Question).
Paso 1: Observación y Pregunta. Primero, notas algo (Observación). Luego, haces una pregunta al respecto (Pregunta).

Illustration

4

Step 2: Hypothesis & Experiment. You make an educated guess (Hypothesis). Then, you design a test (Experiment) to see if your guess is right.
Paso 2: Hipótesis y Experimento. Haces una suposición informada (Hipótesis). Luego, diseñas una prueba (Experimento) para ver si tu suposición es correcta.

Illustration

5

Step 3: Variables & Control Group. In an experiment, you change one thing (Independent Variable) and measure

6

Step 4: Data & Analysis. You collect information (Data) during your

another (Dependent Variable). A Control Group helps you compare.
Paso 3: Variables y Grupo de Control. En un experimento, cambias una cosa (Variable Independiente) y mides otra (Variable Dependiente). Un Grupo de Control te ayuda a comparar.

Illustration

experiment. Then, you look closely at the Data to find patterns (Analysis).
Paso 4: Datos y Análisis. Recopilas información (Datos) durante tu experimento. Luego, examinas de cerca los Datos para encontrar patrones (Análisis).

Illustration

7

Step 5: Conclusion. Finally, you write what you learned. Did your experiment support your Hypothesis? This is your Conclusion.
Paso 5: Conclusión. Finalmente, escribes lo que aprendiste. ¿Tu experimento apoyó tu Hipótesis? Esta es tu Conclusión.

Illustration

8

What is a Lab Report? A Lab Report is a written summary of your entire experiment. It tells others about your Question, Hypothesis, Procedure, Data, and Conclusion.
¿Qué es un Informe de Laboratorio? Un Informe de Laboratorio es un resumen escrito de todo tu experimento. Les cuenta a otros sobre tu Pregunta, Hipótesis, Procedimiento, Datos y Conclusión.

Illustration

Worksheet 1

Name: _____

MATCHING

Match the English vocabulary word with its Spanish translation.

EMPAREJA LA PALABRA DEL VOCABULARIO EN INGLÉS CON SU TRADUCCIÓN AL ESPAÑOL.

1 **Scientific Method**

Método Científico

2 **Observation**

Observación

3 **Hypothesis**

Hipótesis

4 **Experiment**

Experimento

5 **Data**

Datos

6 **Conclusion**

Conclusión

7 **Lab Report**

Informe de Laboratorio

8 **Safety**

Seguridad

Worksheet 2

Name: _____

TRACING

Trace the scientific vocabulary words.

TRAZA LAS PALABRAS DE VOCABULARIO CIENTÍFICO.

1. **Scientific Method**
2. **Hypothesis**
3. **Experiment**
4. **Independent Variable**
5. **Dependent Variable**
6. **Data**
7. **Analysis**
8. **Conclusion**
9. **Lab Report**
10. **Procedure**

Worksheet 3

Name: _____

COLORING

Color the image that represents each word.

COLOREA LA IMAGEN QUE REPRESENTA CADA PALABRA.

1 **Observation**

2 **Experiment**

3 **Data**

4 **Safety**

Teacher Notes

Objective

Students will be able to identify and define key vocabulary related to the scientific method and lab reports in English and Spanish, enhancing their comprehension of scientific inquiry.

Suggested Use

Introduce vocabulary using flashcards or the mini-book. Use the tracing worksheet for spelling practice and the matching worksheet to reinforce English-Spanish connections. The coloring worksheet can be used as a fun review or for early finishers. Encourage students to create their own simple lab report using the learned terms.

Materials Needed

Printed vocabulary flashcards (from image prompts)
Printed mini-books (one per student)
Printed worksheets (one set per student)
Crayons or colored pencils
Science notebooks or paper for additional writing

Differentiation Tips

For struggling learners: Pair students with stronger English speakers. Provide sentence starters for discussions. Allow them to draw instead of write where appropriate.
For advanced learners: Challenge them to write short sentences or paragraphs using the vocabulary words. Ask them to design a simple experiment and outline its steps using the new terms.
For all learners: Incorporate real-life examples of the scientific method (e.g., 'Why does my plant need sun?'). Use visuals consistently.

Answer Key

ws-1

1
Método Científico

2
Observación

3
Hipótesis

4
Experimento

5
