Teacher Notes

Objective

Students will be able to identify, count, and write numbers 1-20 in English and Spanish. They will also be able to match number words to numerals and quantities.

Suggested Use

Introduce numbers 1-10 first, then 11-20. Use flashcards for whole group and small group practice. The mini-book can be read aloud, then students can color and take home. Worksheets can be used for independent practice or in learning centers. Incorporate songs and counting games.

Materials Needed

- Flashcards (number words, numerals, and quantities 1-20)
- Crayons, markers, or colored pencils
- Manipulatives (e.g., counting bears, unifix cubes, blocks)
- Number line (1-20)
- Scissors (for mini-book assembly)

Differentiation Tips

Support: Provide physical manipulatives for counting. Focus on numbers 1-10 before moving to 11-20. Offer hand-over-hand guidance for tracing. Use a number line as a visual aid. Allow students to point to numbers rather than always saying them.
Challenge: Ask students to write sentences using numbers (e.g., 'I see seven birds.'). Introduce simple addition or subtraction problems using numbers 1-5. Encourage skip counting by 2s or 5s. Have students create their own number stories.
