Teacher Notes

Objective

Students will be able to identify and understand 20 basic science vocabulary words in English and Spanish, and use them in simple contexts related to scientific inquiry.

Suggested Use

Introduce 3-5 words per day, using visuals and gestures. Read the mini-book aloud, pausing to discuss vocabulary. Use worksheets as independent practice or small group activities. Encourage students to create their own sentences with the words.

Materials Needed

- Printed vocabulary cards (optional, based on image prompts)
- Printed mini-books (one per student)
- Printed worksheets (one set per student)
- Pencils, crayons/colored pencils
- Magnifying glasses, simple measuring tools (optional, for hands-on observation)

Differentiation Tips

For beginning ELLs: Pair students with a stronger English speaker. Provide sentence frames for verbal practice. Allow them to point to pictures for answers.
For intermediate ELLs: Encourage them to use vocabulary words in short sentences or describe the images. Have them define words in their own words.
Extension activities: Students can create their own 'science journal' using the vocabulary, or design a simple experiment using the scientific method terms.
